-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of the invention of Group I and the species of Figures 2-3 is acknowledged. Claim 2 is readable thereon and will be examined in its full merit. Claims 1 and 5-26 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. Base claim 1 is not examined because it reads on the species of Figure 4, in which an ignition timing is not at all retarded until a negative pressure is equal to or less than a predetermined value. On the other hand, in the elected claim 2, the ignition timing is not at all retarded until after a predetermined elapsed time since a start.

Drawings

2. The drawings are objected to because in Figure 1, the signal line for air flow meter (14) should have an arrow pointing to the ECU; and numeral 28 is not described in the specification. Correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3748

4. Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by Tsunooka (U.S. Patent 6,557,524).

As shown in Figures 1 and 4, Tsunooka discloses a control apparatus of an internal combustion engine (10) comprising:

- a brake booster (18) for increasing a brake force of a brake by using a negative pressure of an intake pipe (34) employed in the internal combustion engine; and

- an ignition retarding control means (12, 54) for executing ignition retarding control to retard an ignition timing at a cold start in order to promote an operation to heat a catalyst for cleaning exhausted gas (see lines 31-39 of column 9),

wherein the ignition retarding control means starts the ignition retarding control after a predetermined time (t_{10}) lapses since a start (see Figure 4A and lines 14-22 of column 10).

Prior Art

5. The IDS (PTO-1449) filed on April 1, 2004 has been considered. An initialized copy is attached hereto.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of two patents and one patent application: Kidokoro et al. (U.S. Patent 6,691,675), Surnilla (U.S. Patent 6,868,667), and Grieser et al. (U.S. Patent Application 2004/0159095) further disclose a state of the art.

Art Unit: 3748

Communication

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tu Nguyen whose telephone number is (571) 272-4862.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Thomas E. Denion, can be reached on (571) 272-4859. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
